

Borroughs Rivet-Span systems are suited for many types of hand-loaded material. Combined with our Aisle-Saver® high-density system it can effectively double storage and filing capacity. Borroughs offers a wide range of posts and beams to accommodate a wide range of loads.

Borroughs Rivet-Span

- Rigid boltless connection between posts and beams
- Quick labor saving installation reduces set-up costs
- All pieces are universal, no lefts or rights, no fronts or backs, no tops and bottoms

Borroughs Aisle-Saver Systems

- Offered in electrical and mechanical assists
- Flexible design, easy to operate
- Increases storage by 50%

Rivet-Span with wire mesh stores record archives in an office environment. The Mechanical Assist Aisle-Saver unit has laminated end-panels with radius corners

Rivet-Span with double rivet beams provides durable wide-span storage, shown with partial board decking.

Rivet-Span with tire beams reduces the footprint of bulky tires and stores them with quick and easy accessibility
