

Company Overview

Borroughs is a U.S.-based manufacturer and engineered systems provider specializing in industrial storage, shelving, and workflow optimization solutions. With almost 90 years of experience and a 500,000-square-foot manufacturing facility, Borroughs delivers scalable systems trusted by blue-chip companies across distribution, automotive, manufacturing, and government sectors.

Engineered System Design

- 3D layout, visualization, and BOM generation using Configura
- Application-specific design for real-world workflows
- Pre-install validation to reduce risk and accelerate decisions

Advanced U.S. Manufacturing

- ISO 9001 compliant & ISO 14001 certified operations
- Precision fabrication (fiber laser, forming, automated processes)
- Scalable production supporting OEM and high-volume demand

Integrated Design-Build-Install Model

- Single-source accountability from concept through completion
- Coordinated logistics and delivery timing
- Installation support and full project management

Comprehensive Product Ecosystem

- Box Edge Plus® shelving systems
- High-density drawers (400 lb capacity, 110% extension)
- Modular drawer cabinets (up to 60% space savings)
- Rivet-Span® bulk storage
- Multi-level and high-rise systems

Scalable Infrastructure Solutions

- Systems designed for growth and operational expansion
- Multi-tier structures maximizing vertical space
- Integration-ready for automated and high-throughput environments

Operational Impact

- Faster parts picking and improved accuracy
- Reduced technician downtime
- Optimized storage density and space utilization
- Improved workflow and inventory accessibility

Summary

Borroughs delivers engineered storage systems that transform operations: combining precision manufacturing, intelligent design, and disciplined execution to help customers maximize space, improve efficiency, and scale with confidence.
