

Company Overview

Borroughs is a U.S.-based manufacturer specializing in industrial storage systems, material handling equipment, and OEM metal fabrication. With almost 90 years of manufacturing experience, Borroughs supports OEM partners, system integrators, and enterprise customers with scalable, high-quality solutions.

- Headquarters: Kalamazoo, Michigan
- Manufacturing Footprint: ~500,000 sq. ft.
- ISO 9001 compliant (Quality)
- ISO 14001 certified (Environmental)
- Core Focus: Engineered storage systems and precision metal fabrication

Manufacturing Capabilities

- Fiber laser cutting (high-speed, high-precision processing)
- CNC forming and fabrication
- Powder coating (durable, environmentally compliant finishes)
- Assembly and kitting operations
- OEM / contract manufacturing support

Capabilities Include:

- Mild steel, stainless steel, aluminum processing
- High-volume and repeatable production
- Custom fabrication and engineered components

Quality Systems & Controls

- ISO 9001 compliant quality management system
- ISO 14001 certified environmental processes
- Corrective action and continuous improvement systems

Quality Focus Areas:

- Process consistency and repeatability
- Product fit, finish, and functional performance
- Pre-production validation and testing

Engineering & Design Support

- 3D modeling and system visualization (Configura integration)
- CAD-based engineering and layout development
- Bill of material generation and cost modeling
- Application-specific system design

Engineering Scope:

- Storage systems
- Structural layouts (multi-level, high-rise systems)
- Custom OEM component design

Supply Chain & Production Capacity

- Multi-shift manufacturing capability
- Scalable production aligned with customer demand
- Structured planning and inventory management
- Coordinated logistics and delivery scheduling

Performance Focus:

- On-time delivery
- Production scalability
- Supply chain reliability

Product & System Capabilities

- Industrial shelving systems (clip-style, high-capacity)
- High-density storage systems (drawer-based solutions)
- Bulk storage (Rivet-Span®)
- Multi-tier and structural systems (125 PSF standard design)
- Workstations and integrated storage solutions

EHS & Compliance

- OSHA-aligned workplace safety practices
- Environmental compliance under ISO 14001
- Powder coating systems with low environmental impact
- Ongoing safety training and monitoring

Program & Project Execution

- Design-to-install project support
- Cross-functional coordination (engineering, manufacturing, logistics)
- Installation documentation and field support
- Post-install follow-up and lifecycle support

Key Strengths for OEM Partners

- U.S.-based manufacturing.
- Proven ability to support high-volume and custom programs
- Integrated engineering and production capabilities
- Strong quality control and traceability
- Reliable delivery and project execution

Summary

Borroughs provides OEM partners with a reliable, scalable manufacturing and engineering partner: combining quality systems, advanced fabrication capabilities, and disciplined execution to support long-term program success.
